

Cutting-Edge Imaging Solutions for Energy, Marine Science, and Defense

SubC Imaging is renowned for pioneering advanced underwater optical imaging systems. With a commitment to modular, scalable, and adaptable technology, we integrate state-of-the-art solutions for precise and efficient inspections and surveys in challenging environments.

Key Technologies

Cameras:
High-resolution imaging for detailed underwater inspection and surveys.

DVR Software:
Advanced recording, logging, and playback capabilities for comprehensive data management.

Lights & Lasers:
Precision light and laser devices to give image scale and measurements.

Remote Operations:
Integrated systems for efficient remote inspections.

Proven Success Stories

Case Study:
Enhancing Offshore Asset Inspection with Wood & Rayfin Rapid Digital Imaging

Case Study:
SubC Camera Helps Reveal First Results from the Holyrood Subsea Observatory
