

Vetted Industrial Power & Signal Panel Assemblies

October 30, 2019

Reliability for Agriculture, Medical, Marine, Transportation and Heavy Equipment is always relevant. It is even more so when considering complex assemblies with many potential vulnerable connection points. Terminations are often stressed during installation and go undetected until exposed to the outdoors and vibration when the potentially become latent failure points. Trust OCP to "bake-in" preventive processes and materials for your assemblies.

OCP's OEM customers span all these industries throughout North America for one reason; trust. Trust in the manufacturing processes that go beyond IPC/WHMA 620 standards. Trust in the material sourcing that can add value by legacy supply chains and a comprehensive vetting process for new sources. Trust in a QC system that enhances reliability at all levels resulting in 10 years of 99+% defect-free delivered product.

OCP can provide custom tooling for many Industrial Design aspects including sheet metal interface panels, custom tooled insert molds or gasket materials for IP6X sealing. Our expansive supply chain for the appropriate components ranging from adhesives to connectors to bulk cable further enhances our value proposition. Please consider OCP Group for your next complex panel assembly at sales@ocp.com or visit our website at ocp.com.

"Connect With Confidence"

Company details: Established in 1988, OCP manufactures high reliability cables and wire harnesses. The company is headquartered in San Diego, California and operates manufacturing facilities in Mexico, California and China. OCP Group's manufacturing facilities all operate under either a ISO 9001: 2015, 13485:2003 QMS system and strictly adhere to the IPC/WHMA 620 workmanship standard. OCP Group has been an Inc. 5000 Fastest Growing Private company for the last 3 years.
